Theme: Cosmos
Description: Responsive Bootstrap 3 Landing Page
Version: 1.0
Date Released: 02/23/2014
Author: embodoo@gmail.com

Thank you for purchasing this theme. Please feel free to contact me if you have any questions or inquiries.

HTML Structure

Cosmos is an app landing page. This theme was built using Twitter's Bootstrap framework with HTML5. It has a fully responsive design with all the necessary marketing blocks you may need to showcase your app or any digital downloads.

`index.html` is the main HTML file of this theme.

The markups are well-commented and has the corresponding heading when you are to edit `default.css`

For example, if you are to edit the header in the HTML file:

```
<!-- Header -->
```

Look for the following in the CSS file:

```
/*---------- Header ----------*/
```

Google Fonts are also integrated into this theme. To change your google fonts link please acquire it from Google Fonts and copy link to replace this line in your index.html

```
<link href='http://fonts.googleapis.com/css?family=Lato'
rel='stylesheet' type='text/css'>
```

CSS

`default.css` is the main CSS file for this theme. You can edit this file directly or you can create your own styling css. Either are okay but please be reminded to make backups before you edit the main CSS file.

To create your own styling, please make sure to edit this CSS file:

```
<!-- Add custom CSS here -->
<link href="css/custom.css" rel="stylesheet">
```

Aside from the Bootstrap core CSS file, here are the other CSS files included in this theme:

Font Awesome
`fontawesome.min.css`

Owl Carousel
`owl.carousel.css`
`owl.theme.css`

Magnific-Popup
`magnific-popup.css`

Flexslider
`flexslider.css`

JavaScripts

This theme has the default Bootstrap's core jQuery with some open-source plugins:

Flexslider - The plugin is used in the `#hero` section.
`jquery.flexslider.js`

Magnific-Popup - The plugin is used in the `#video` section.
`jquery.magnific-popup.js`

Owl Carousel - The plugin is used in the `#gallery` section.
`owl.carousel.js`

`script.js` is the main JS file of this template. It contains all the initializations of the following IDs and classes.

```
#main-slider
#popup-vimeo
#owl
.social-icons a
```

MailChimp Integration and Sidebar Menu is also initialized in the JS file.

The JS file is well-commented to guide you when you edit effects especially for the carousels and sliders.

Owl Carousel has been set to display 4 slides for Desktops and 1 slide for small devices such as Tablets and Smart Phones. To edit this default setting, please look for the line below in your JS file.

```
owl.owlCarousel({
items: 4,  //This is the default number of slides
itemsDesktop : [1000,5],
itemsDesktopSmall : [900,3],
itemsTablet : [600,1],
itemsMobile : false
})
```

Setup MailChimp

1. Open `subscribe.php`
2. Enter your API Key
3. Enter List ID
4. Important: Make sure to setup the correct submit url

      e.g
      if you have us3 last 3 digit in your API key, you should change the url to us3.

      Default submit url:
      `http://us2.api.mailchimp.com/1.3/?method=listSubscribe`
